## TBS X509 E-mail Professional

TBS X509 E-mail Professional is a class 2+ client certificate allowing its owner to sign and encrypt emails, to authenticate strongly, to perform digital signatures and document signing such as PDF or XML.

TBS X509 E-mail Professional certificates are delivered after an audit of their future holder and of their organization. They guarantee the integrity of your digital documents and gives them a real legal value.

*trust booster*

TBS INTERNET was founded in 1996 by IT security specialists to help companies comply with encryption best practices. Customers include leading companies, value-added resellers and public sectors.

Since the early days, TBS INTERNET offered a highly professional service issuing as well as installing digital certificates for its clients. As Internet usage grew and companies began to require specialized online security, it was the first to create a multi-brand digital certificate platform, securing platinum partnerships with major SSL providers.

Thanks to its own certification authority "TBS X509" the company can provide competitive authenticated certificates very well supported in browsers.

### tbs X509

TBS X509, TBS Internet's own brand, was created back in 2006 to provide a wide range of server and user certificates.

With over 10 years experience in the industry, as well as a highly qualified, highly professional support team, TBS INTERNET has all what is required to cover your digital certification needs.
