## TBS X509 12 Multiple Sites

Need to secure several sites names / domains without having to handle a substantial number of certificates and what it implies (renewal, reissuance...)?

With the TBS X509 12 Multiple sites you can gather 12, up-to 100 SANs, on a single certificate.

It is an ideal product for ISPs, providing mutualized hosting, or companies handling their own servers.

TBS X509 Multiple Sites is a SHA256-signed certificate that offers the highest security level currently available.

*trust booster*

TBS INTERNET was founded in 1996 by IT security specialists to help companies comply with encryption best practices. Customers include leading companies, value-added resellers and public sectors.

Since the early days, TBS INTERNET offered a highly professional service issuing as well as installing digital certificates for its clients. As Internet usage grew and companies began to require specialized online security, it was the first to create a multi-brand digital certificate platform, securing platinum partnerships with major SSL providers.

Thanks to it's own certification authority "TBS X509" the company can provide competitive authenticated certificates very well supported in browsers.

### tbs X509

TBS X509, TBS Internet's own brand, was created back in 2006 to provide a wide range of server and user certificates.

With over 10 years experience in the industry, as well as a highly qualified, highly professional support team, TBS INTERNET has all what is required to cover your digital certification needs.

the trust seal
